Allowable Subject Matter

1. Claims 2-7, 10-15 and 17-19 of which have been renumbered as 1-15 respectively are allowed.
2. The following is an examiner's statement of reasons for allowance: Regarding claims 1-15, the prior art of record fails to teach of a retrieving portion connected to the information memorizing portion for deciding whether all or a predetermined part of the header information of the received packet is memorized in the information memorizing portion as the packet header pattern or not to produce the differentiated result signal when all or the predetermined part of the said header information coincides with the packet header pattern. The closest reference, Okuda et al. (U.S. Patent No. 5,892,762), teaches of a buffer control system for managing a queue serving packets in a switch, the system comprising: a differentiating portion, an adding portion, a buffering memory and a discarding portion, but fails to teach of a retrieving portion connected to the information memorizing portion for deciding whether all or a predetermined part of the header information of the received packet is memorized in the information memorizing portion as the packet header pattern or not to produce the differentiated result signal when all or the predetermined part of the said header information coincides with the packet header pattern. Additionally, Zheng et al. (U.S. Patent No. 6,611,522), teaches of a transmission queue management system comprising a differentiating portion, an adding portion, a buffering memory and a discarding portion, but fails to teach of a retrieving portion connected to the information memorizing portion for deciding whether all or a predetermined part of the header information of the received

packet is memorized in the information memorizing portion as the packet header pattern or not to produce the differentiated result signal when all or the predetermined part of the said header information coincides with the packet header pattern.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Liam McDowell on 5/13/2005.

Claim 17, line 18, after "threshold", "." has been changed to --,--.

Claim 17, line 19, insert

"wherein said differentiating portion comprises:

an information memorizing portion for memorizing at least one packet header pattern, and

a retrieving portion connected to said information memorizing portion for deciding whether all or a predetermined part of said header information of said received packet is memorized in said information memorizing portion as said header pattern or not to

Art Unit: 2664

produce said differentiated result signal when all or said predetermined part of said header information coincides with said packet header pattern.”.
